
Purity Control OnRoll (PCR)

With the OCS Purity Control OnRoll (PCR), plastic films on the roll in the winder can be inspected and all types of contamination can be detected. Simple integration into the winder is possible. In addition, Purity Control OnRoll (PCR) can be implemented in the existing FSP600 system software or used as a stand-alone solution. PCR allows inspection widths of up to 10 metres. It is particularly suitable for flat, blown and cast films, biaxial stretch film, laminating and slitting lines.

Testable Products (Roll in the Winder)

- Blown films, cast (Flat) films and plates (PP, PET, PE, ABS, PC, PMMA, etc.)
- Coating films (aluminium, painted, etc.)
- Biaxial stretch films
- Surface protection films
- Medical and pharmaceutical films
- Optical films
- Food and barrier films
- Hygiene and nappy films, non-wovens and laminates
- Technical films, etc.

Features

- Easy integration into existing winders
- Integration into the FSP600 Software
- Can also be used as a stand-alone system

Web Inspection System (FSP600)

With the OCS Web Inspection System FSP600, all types of irregularities in films, laminates and non-wovens can be detected in real time using high-speed cameras. They defects often reduce the quality of the film and the end product. These include gels, burners (black specks), fisheyes, holes, wrinkles, scratches, coating defects, water droplets, oil stains, insects, bubbles, nozzle marks and craters, etc. Additional features of the FSP600 system are the data transfer of real-time results to the production and process control as well as product improvement by sorting/labelling contaminated web sections. Sample Tester (ST4)

The OCS Sample Tester (ST4) is a compact tabletop unit for the optical analysis of transparent and non-transparent surfaces, such as plastics, steel, paper, textiles and non-wovens, for irregularities and contamination. It is used in the laboratories of manufacturing companies as well as in research and development centres. The system can operate in reflection or transmission mode depending on the material.
